DETAILED ACTION

Drawings

The drawings are objected to because it is not clear if figures 1 and 3 are conventional or figures 1 and 2 as noted in the specification because figures 1 and 3 of the drawings, themselves, are indicated as being "Prior Art". Also, it does not appear that element #16 in figure 2 is an opening as indicated on page 6 of the specification. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,6-8,11 and 13-20 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent #6,116,678 to BECK. In reference to claims 1,17 and 20, BECK discloses a window assembly including and elongate transparent pane (34), at least one lighting assembly (32) and at least one opaque covering (33,73); wherein the opaque covering (33,73) includes at least one aperture (35) and (92a,b). Regarding claim 2, the opaque covering (33,73) covers a minor area of the interior of the elongate transparent pane (34). In reference to claims 3,6-8 and 13-15, the opaque covering (33,73) is an elastomeric film (73) adhesively affixed, column 5, lines 18-22. Regarding claim 11, the lighting assembly (32) is aligned with the aperture (35) and (92a,b). In reference to claim 16, the opposite ends of the lighting assembly (32) is mounted adjacent the interior of the elongate transparent pane (34). Regarding claim 18, the apertures (35 and 92a,b) are aligned. In reference to claim 19, the translucent covering 933,73) is tinted, column 5, line 11.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 4,5,9,10 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent #6,116,678 to BECK. BECK discloses the basic claimed window assembly except for indicating that the opaque covering covers surfaces along the edges of the transparent pane, except for the apertures being a plurality of spaced apart slots, and except for the slots being aligned with the lighting assembly. Regarding the edges of the pane being covered, this would have been an obvious matter of design choice. In reference to the number and type of apertures, it too would have been an obvious matter of design choice to select slots having a desired shape.
